Last Updated Thursday, 16 August 2007

UPDATE 2 August 9, 2007: To clarify, the MTH 320 is being offered in place of a Liberal elective. Students who have enrolled in a liberal elective will be deregistered when they contact Iqbal Khan to enrol in the Calculus course.

UPDATE August 9, 2007: As per Prof. Kieh Wong email: "If you wish to register for it, please contact Iqbal Khan (mikhan@centennialcollege.ca) who can do it manually on BANNER.

The text will be the same as the one used last year (16 students took the course last year.)"

Textbook: James Stewart, "Single Variable Calculus: Concepts and Contexts", 3th Edition  
Brooks/Cole Publishing Company, ISBN 0534-40992-X

As of today, July 30, 2007, all degree students without holds are able to register for courses. Those going into their 7th semester (4th year) looking to enroll in the MTH 320 Calculus with Applications course may have noticed that it is not listed on MyCentennial. I have just confirmed with Prof. Kieh Wong that the course is being offered. Prof. Iqbal Khan has been notified of the issue and will be in contact with the appropriate team to rectify this problem.

This post will be updated as more information is received.
